EXPERIENCE

Sears Holding India | 2021 – 2022, About 1 year Exp.
Working in **SEARS** as an Intern for **FullStack Developer** role.

- My work is to implement new features by updating the previous code or developing from scratch.
- Experience in **ReactJs** and its Lifecycle methods along with **Rest Api** and **GraphQL** . I have a good understanding of **Typescript**.
- Good understanding with design patterns and reusable code to make code more readable and performance efficient.
- Knowledge in **CI/CD** pipeline, Understanding in **Git** , **Github** and **Jira**.
- Good understanding in **Test Driven Development** and **unit test cases**
- Actively Solved production **bugs , issues and debugging**

Freelance Experience | 2022- present, About 1+ year
Working with different clients and making solution for them

- Worked in a **ReactJS** based project with high **reusability** with **React Hooks**.
- Also have worked with **React Context** and **redux** for state management
- I have used different libraries for building a web based UI and frameworks like **NextJS**, **vueJS**
- Worked with **NodeJs**, python **FastApi**.

PROJECTS

Dev Flow
12/2022 - 02/2023
Visualisation based web interface to make flow chart diagrams.

- This project uses React flow library and uses React Context for managing the state.
- Integrated with firebase to save data for the user,
- https://github.com/frtug/flow-diagram

Covid Tracker (India)
01/2021 - 01/2021
Show the Covid19 Live data based in India and on hovering over the states of India

- API Calling to get the data and a web Interface on React.
- https://github.com/frtug/Covid_19-tracker

ACHIEVEMENTS

- I have published a research paper in field of Artificial Intelligence in Web(2021)
- I solved 100+ leetcode Data Structure problems and 3+ stars in hacker rank.
